

Provides Scalable, Secure, and Robust platforms for end-to-end security solutions.

The ISS NVR line provides scalable, secure, and robust platforms for end-to-end security solutions. It is optimized to run our industry-leading SecurOS® Video Intelligence Platform and designed for small- to large-scale deployments with large camera counts and bandwidth requirements in mind. Additionally, the NVRs are engineered to efficiently run ISS video analytics modules and to support SAN/NAS expansions.

The SecurOS® Analytics 505 Series server line offers enterprise network video servers designed to run ISS video analytics modules. The 505 Series models support running ISS analytics in a low to medium capacity. These NVRs come with the 13th generation Intel® Core™ i7

Servers Designed for Your

Security and Business Needs.

processors to provide high-end performance and fast processing. In addition, the 505 Series models offer up to 40TB of storage, have two supported form factors, and offer a number of extended support options. These NVRs provide a complete video management, recording, and viewing solution in a single unit, to easily deploy a unified system combining video surveillance and ISS video analytics.

Best in class components with a warranty to match, the SecurOS® NVR is designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each NVR endures the toughest installations.
