*Provides Scalable, Secure, and Robust platforms for
end-to-end security solutions.*

The ISS server line provides scalable, secure, and robust platforms for end-to-end security solutions. It is optimized to run our industry-leading SecurOS® Video Intelligence Platform and designed for small- to large-scale deployments with large camera counts and bandwidth requirements in mind. Additionally, the servers are engineered to efficiently run ISS video analytics modules and to support SAN/NAS expansions.

The SecurOS® Analytics 530 Series server line offers enterprise network video servers designed to run ISS video analytics modules. The 530 Series models support running ISS analytics in a medium to high capacity. These servers use Intel's latest processors to

provide high-end performance and fast processing. In addition, the 530 Series models offer up to 120TB of storage, have redundant power supplies, and offer a number of extended support options. These servers provide a complete video management, recording, and viewing solution in a single unit, to easily deploy a unified system combining video surveillance, access control, and ISS video analytics.

Best in class components with a warranty to match, the SecurOS® Servers are designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each server endures the toughest installations.

Enterprise Video & Analytics
Servers Designed for Your
Security and Business Needs.
