*Provides Scalable, Secure, and Robust platforms for  
end-to-end security solutions.*

The SecurOS® Rugged NVR Series is designed to accommodate installations for harsh environments and provide a comprehensive product offering that is flexible and versatile for a variety of applications. The applications ideal for the SecurOS® Rugged Series include environments that require wider operating temperatures, vibration, and shock endurance, along with EMC certifications. These NVRs are ideal for industries such as military, industrial, aerospace and power stations when used in harsh environments and remote locations.

The rugged NVRs are powered by the industry-leading SecurOS® Video Intelligence Platform, and are

designed for video recording as well as running the SecurOS® AI Analytics modules. The NVRs offer a fanless embedded solution powered by 12th Generation Intel® processors for high level performance. The SecurOS® Rugged Series delivers the right solutions to support projects with special environmental and performance requirements for harsh conditions.

Best in class components with a warranty to match, the SecurOS® Rugged NVR is designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each NVR endures the toughest installations.

Enterprise Video & Analytics
