*Provides Scalable, Secure, and Robust platforms for
end-to-end security solutions.*

The ISS NVR line provides scalable, secure, and robust platforms for end-to-end security solutions. It is optimized to run our industry-leading SecurOS® Video Intelligence Platform and designed for small- to large-scale deployments with large camera counts and bandwidth requirements in mind. Additionally, the NVRs are engineered to efficiently run ISS video analytics modules and to support SAN/NAS expansions.

The SecurOS® VMS NVR 170/175 Series is a powerful rackmount hardware platform, designed to meet the most demanding security video requirements. The 170/175 Series are network video recorders designed

for small to mid-scale video surveillance deployments, and are optimized for up to 350 Mbps of throughput for continuous recording. These NVRs provide a complete video management, recording, and viewing solution in a single unit, to easily deploy a unified system combining video surveillance, access control, building automation, automatic license plate recognition, and other ISS video analytic modules.

Best in class components with a warranty to match, the SecurOS® NVR is designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each NVR endures the toughest installations.
