*Provides Scalable, Secure, and Robust platforms for end-to-end security solutions.*

The ISS server line provides scalable, secure, and robust platforms for end-to-end security solutions. It is optimized to run our industry-leading SecurOS® Video Intelligence Platform and designed for small- to large-scale deployments with large camera counts and bandwidth requirements in mind. Additionally, the servers are engineered to efficiently run ISS video analytics modules and to support SAN/NAS expansions.

The SecurOS® Analytics 570 Series server line offers enterprise network video servers designed to run ISS video analytics modules. The 570 Series models support running ISS analytics in a high capacity. These servers use Intel's latest processors to provide

high-end performance and fast processing. In addition, the 570 Series models offer up to 160TB of storage, have redundant power supplies, and offer a number of extended support options. These servers provide a complete video management, recording, and viewing solution in a single unit, to easily deploy a unified system combining video surveillance, access control, and ISS video analytics.

Best in class components with a warranty to match, the SecurOS® Servers are designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each server endures the toughest installations.

Enterprise Video & Analytics Servers Designed for Your Security and Business Needs.
