

SecurOS™ Analytics NVR 505 Series Datasheet

KEY FEATURES:

- Optimized for ISS Analytics
- 3 Supported Form Factors: SFF, Tower, and Rack
- Up to 32TB Raw Data Storage
- Intel® 9th Generation Core™ Processor
- Intel® QSV Support for powerful Decompression
- SecurOS™ VMS Pre-installed
- Upgrade to NVIDIA® Graphics Card for GPU Processing
- 5 Year Global Next Business Day On-site Warranty (Keep Your Own Drives)

The ISS Video Server line provides scalable, secure, and robust platforms for end-to-end security solutions. Our servers come with the industry-leading SecurOS™ video management software pre-loaded for fast and easy deployments. The servers are designed for small to large installations, with large camera and bandwidth requirements. Additionally, the servers are engineered to efficiently run ISS video analytics modules and to support SAN/NAS expansions.

The SecurOS Analytics 500 Series server line offers enterprise network video servers designed to run ISS video analytics modules. The 505 models support running ISS analytics in a low to medium capacity. These NVRs come with the 9th generation Intel® Core™ i7 processors to provide high-end performance and fast processing. In addition, the 505 models offer up to 32TB of storage, have three supported form factors, and offer a number of extended support options. These NVRs provide a complete video management, recording, and viewing solution in a single unit, to easily deploy a unified system combining video surveillance and ISS video analytics.

Best in class components with a warranty to match, the SecurOS Server is designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each server endures the toughest installations.
