

SecurOS™ VMS Server 400 Series Datasheet

KEY FEATURES:

- 1.3 Gbps Throughput
- SecurOS™ VMS Pre-installed
- Up to 288TB Raw Data Storage
- NL-SAS Drives for High-performance Recording
- Redundant Power Supplies
- 2 Solid State OS Drives (RAID1)
- 10 Gbps SFP+ Network Interface
- DAS, SAN, and NAS Expansion Options
- 5 Year Global Next Business Day On-site Warranty

The ISS Video Server line provides scalable, secure, and robust platforms for end-to-end security solutions. Our servers come with the industry-leading SecurOS™ video management software pre-loaded for fast and easy deployments. The servers are designed for small to large installations, with large camera and bandwidth requirements. Additionally, the servers are engineered to efficiently run ISS video analytics modules and to support SAN/NAS expansions.

The SecurOS VMS Server 400 Series is a powerful rackmount hardware platform, designed to meet the most demanding security video requirements. The 400 Series are enterprise network video recorders designed for large-scale video surveillance deployments, and are optimized for up to 1.3 Gbps of throughput for continuous recording. These servers provide a complete video management, recording, and viewing solution in a single unit, to easily deploy a unified system combining video surveillance, access control, building automation, automatic license plate recognition and other ISS video analytic modules.

Best in class components with a warranty to match, the SecurOS Server is designed to give you the power you need with the performance you can rely on. ISS tests, tunes, and guarantees that each server endures the toughest installations.
